

Ecological Clerk of Works (ECoW)

Ecological Clerk of Works (ECoW) is an increasingly important role in construction projects that can help avoid, reduce and manage environmental risks. The RML team of ecologists and environmental scientists have a track record of providing this service on some high-profile highways and infrastructure projects throughout Wales.

The ECoW typically provides the following services: -

- Pre-construction ecological surveys
- Advise on the presence and eradication of Invasive Non-Native Species (INNS) including Japanese Knotweed
- Environmental Risk Assessments
- Preparation of Reasonable Avoidance Measures (RAM's) and Register of Environmental Actions and Commitments (REAC)
- Delivery of toolbox talks to Contractors and site personnel
- Licence applications for protected species
- Site clearance of flora and fauna including protected species
- Implementation and monitoring of ecological mitigation and pollution control measures

RML's team of ecologists are CIEEM members and have a range of expertise that can be tailored to fit the needs of your project and the environmental risks that may be encountered.

Please feel free to contact us in the first instance for an informal discussion to talk about the needs and timing of your project.
